SAP Business One

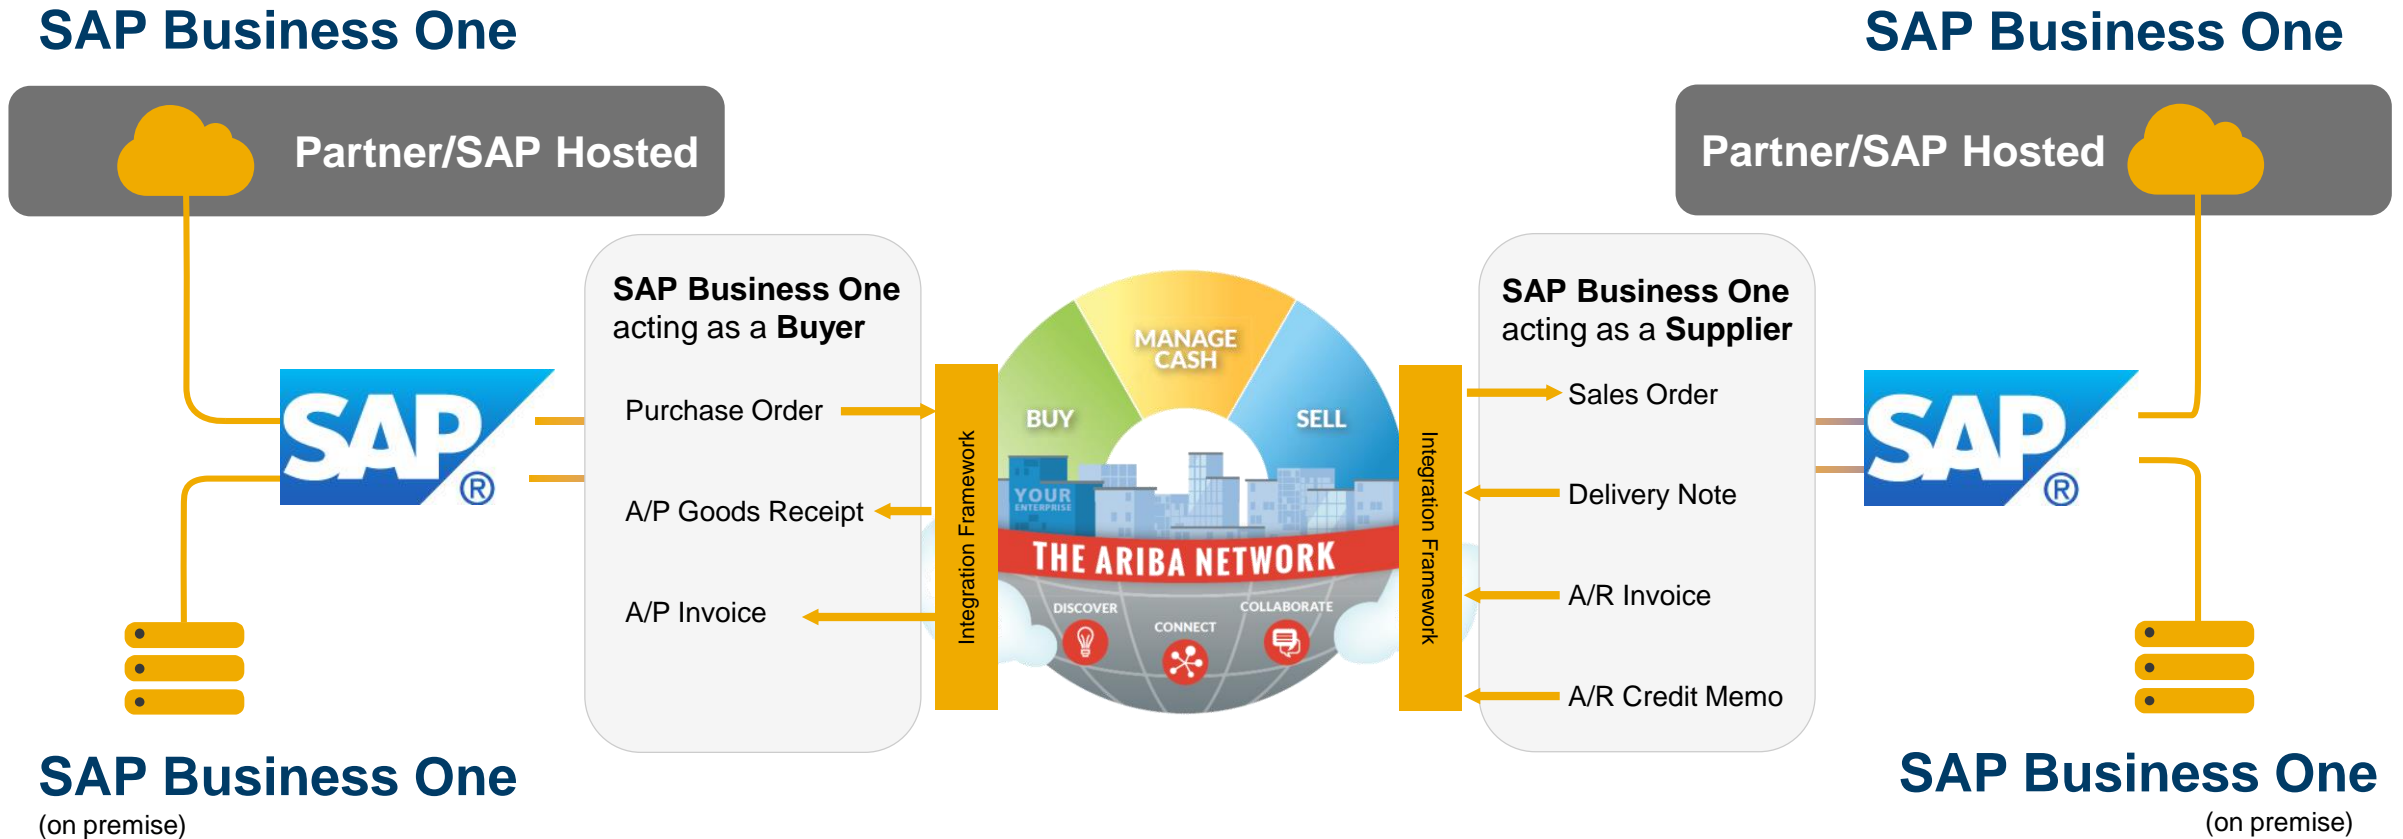

SAP Customer Checkout*

*Localized for specific countries only

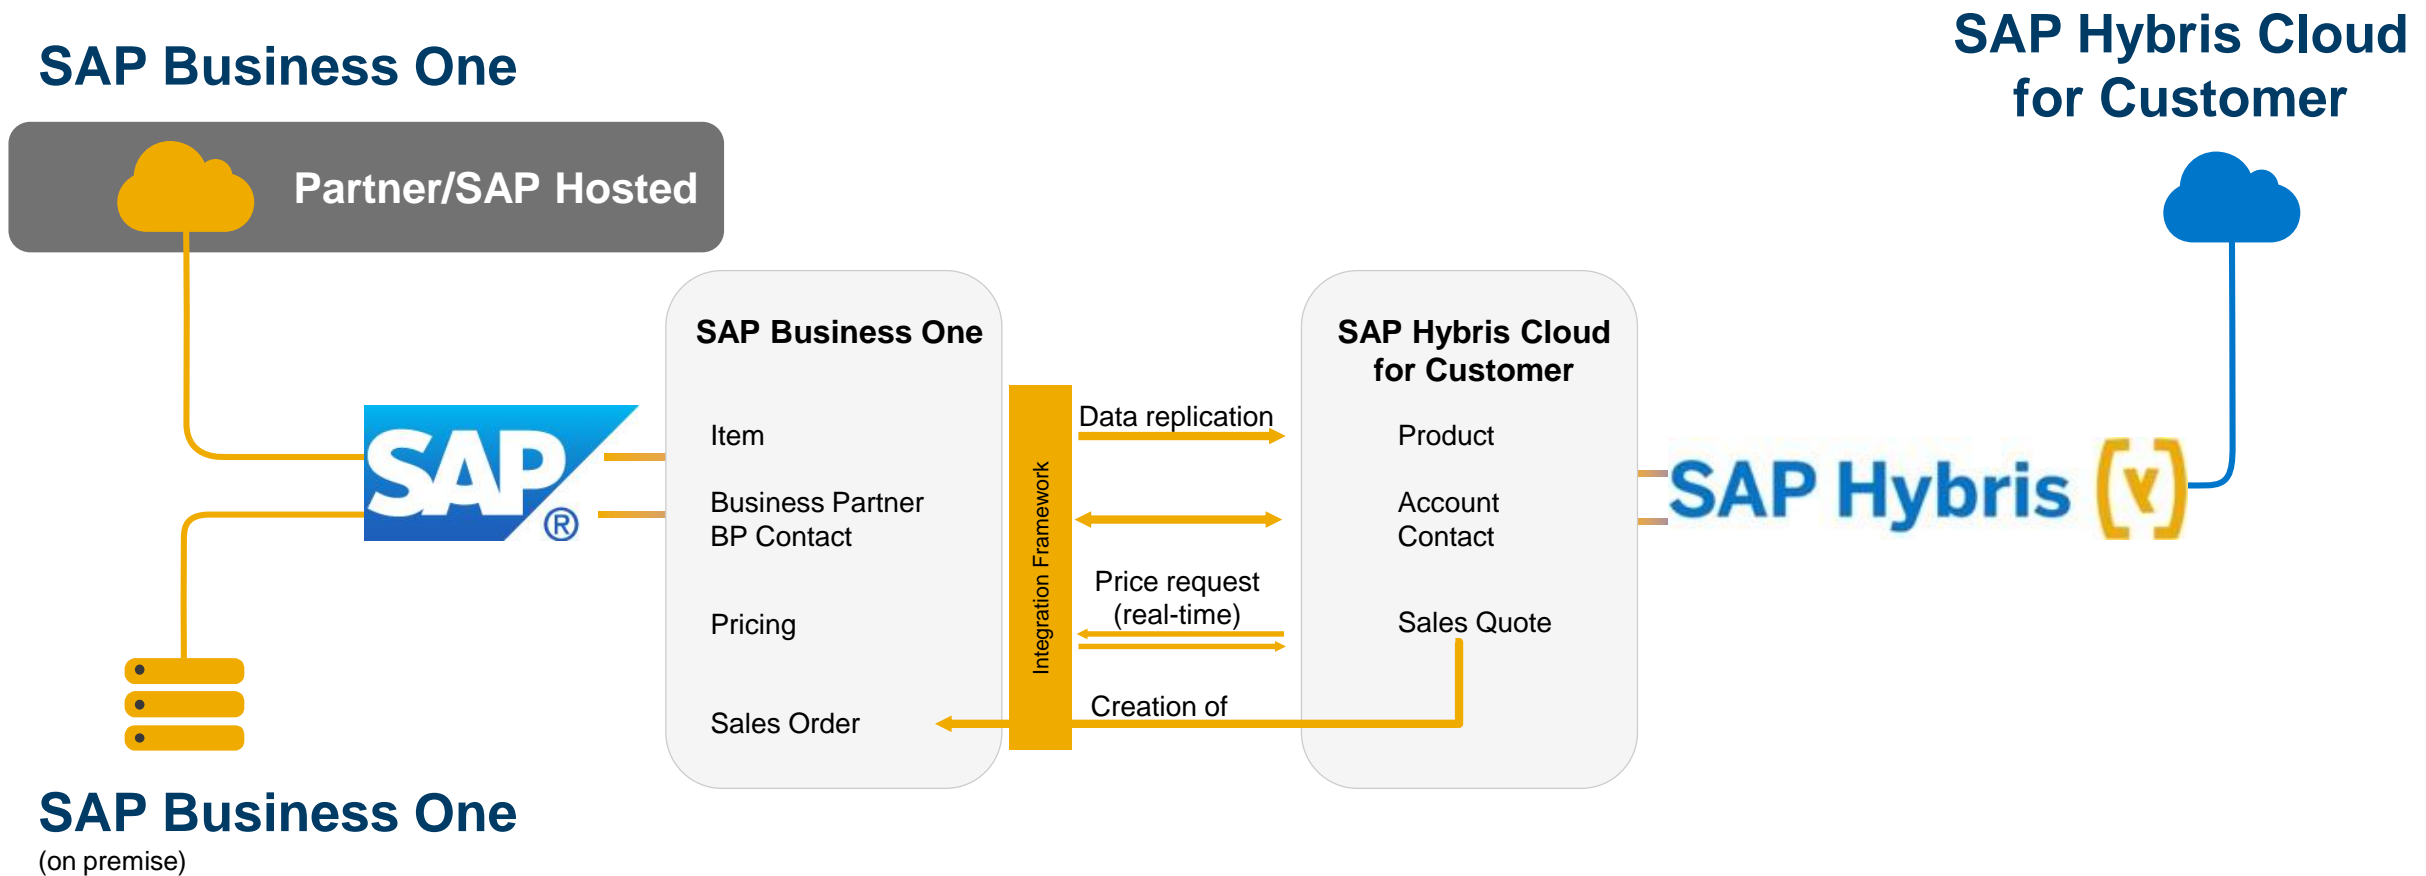

SAP Business One Integration Package for the Ariba Network

SAP Ariba is a leading business network integration for business-to-business transactions and the connection to the Ariba Network allows process integration with trading partners within the network.

SAP Business One Integration with SAP Hybris Cloud for Customer

The CRM SaaS solution SAP Hybris Cloud for Customer is a platform to align the selling process to prospects' and customers' buying journey.

The Technical Aspects of the **Integration Framework**

The Integration Framework in General

The integration framework for SAP Business One is part of the SAP Business One installation:

Simple to install and runs on SAP HANA and Microsoft SQL Server

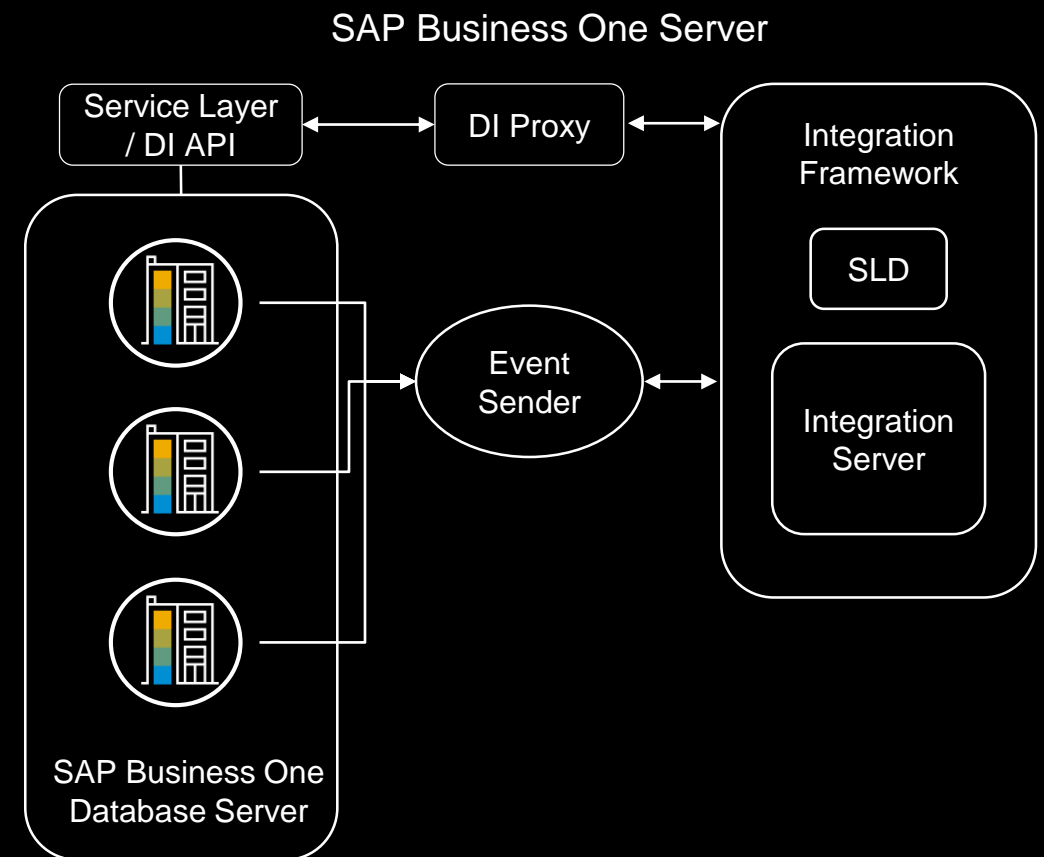

Can integrate SAP and non-SAP systems, web and cloud-based applications, and services

Including message and error handling, business process control, tracking, logging, transaction control, security

Uses established integration standards such as XML and XSLT

Scenario Step Processing in the Integration Framework

The integration framework is an integration and collaboration server to develop and run integration scenarios. The scenario packages consist of different scenario steps with all required data.

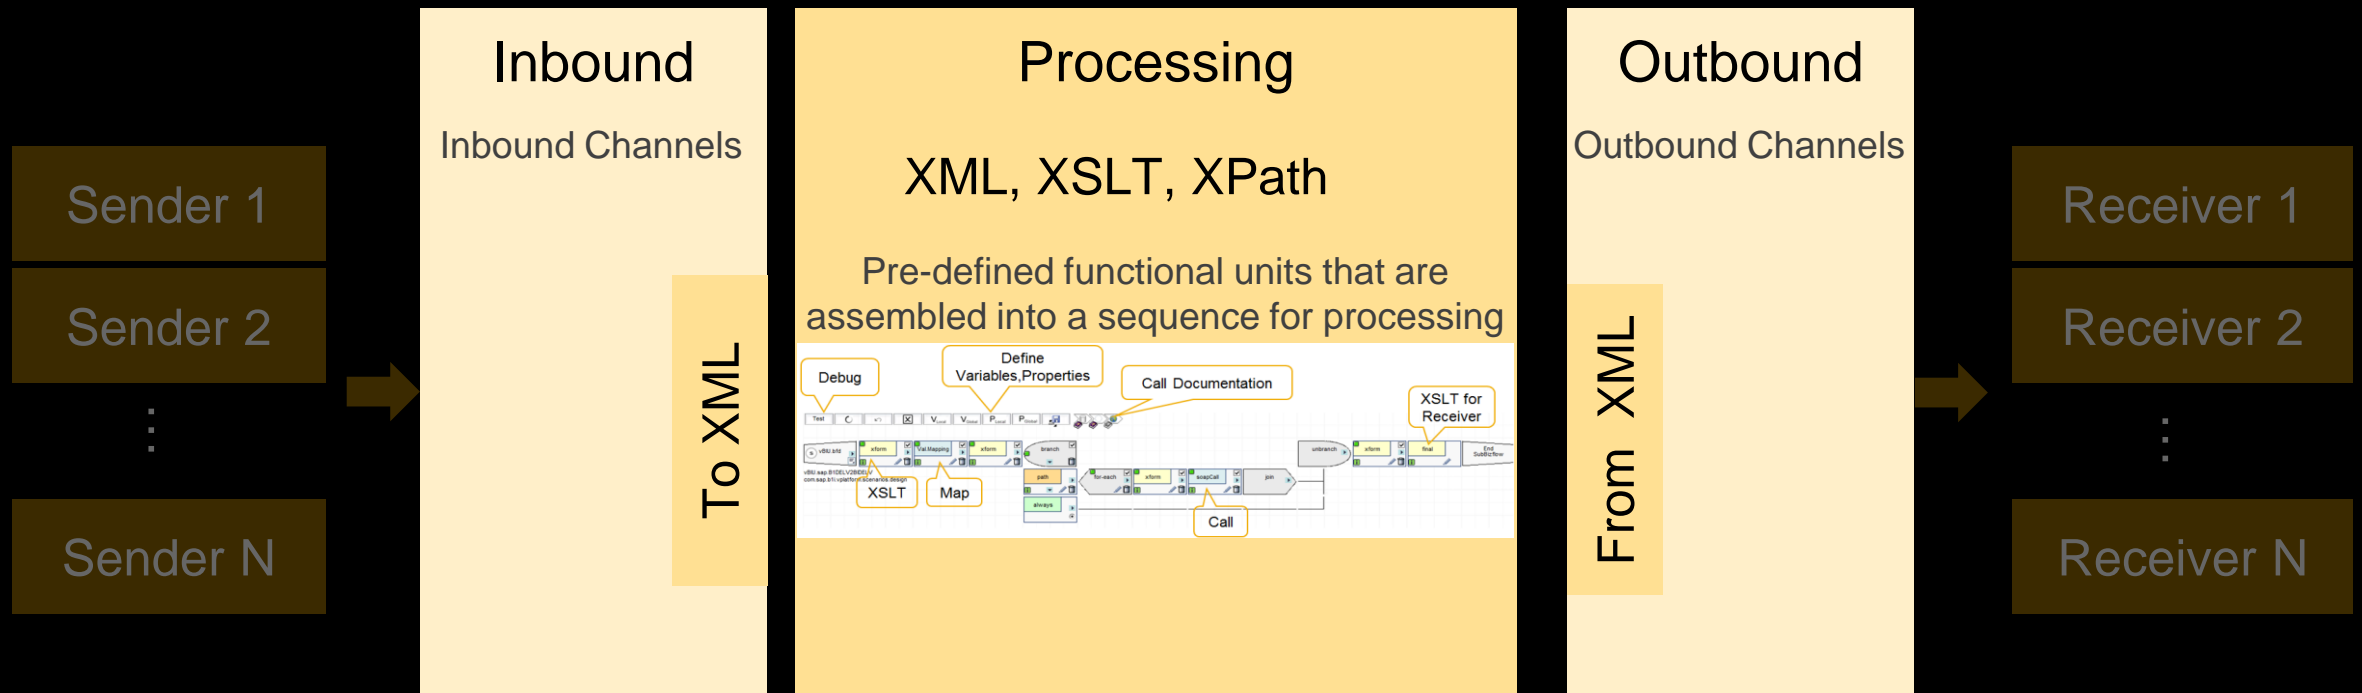

A scenario step consists of these phases and the data is internally processed as XML message.

Scenario Step Building Blocks

Definitions in the step design:

- Inbound and Outbound channels, e.g. SAP Business One, Database, HTTP, File, Timer, Web Service, SAP ERP
- Processing Phase

Benefits and Key Aspects of the **Integration Framework**

Benefits and Key Aspects of the Integration Framework

Connects SAP and non-SAP systems

Supports SAP HANA platform and Microsoft SQL database

Expanding the scope of SAP Business One:

- Various use cases
- Best practice scenarios

All integration aspects covered in one product:

- Supports Business Process Management Notation (BPMN)
- Programming language addresses integration requirements

Two deployment options available: On premise and Cloud
